### **DETAILED ACTION**

The following office action is in response to the Request for Continued Examination filed on January 3, 2008. Claims 1, 4-21 are pending.

#### ***Allowable Subject Matter***

1. Claims 1, 4-21 are allowed.
2. The following is an examiner's statement of reasons for allowance:

With respect to independent claim 1, the prior art of record does not teach a liquid crystal display system comprising a first signal wire adjacent to a ground surface area through which the shift clock signal is transmitted to said data driver; and a second signal wire through which a first clock signal having a frequency to a shift clock difference of 90 to 270 degrees is transmitted to the ground surface area through a resistor, the second signal wire being a direct current connection to ground surface area through the resistor, the first clock signal being generated in the timing controller, the first signal wire and the second signal wire being formed in parallel.

With respect to independent claim 10, the prior art of record does not teach a liquid crystal display system comprising a first shift clock signal wire and a second shift clock signal wire through which the first shift clock signal and the second shift clock signal are respectively transmitted, the second shift clock signal wire being a direct current connection to a resistor directly connected to ground, the first shift clock signal wire and the second shift clock signal wire being formed in parallel.

With respect to dependent claims 4-9, 11-21, these claims are allowed as they depend upon independent claims 1 and 10, above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
